Akaram Ganesh

Aspiring SDET | QA Automation Engineer
ganeshakaram58@gmail.com | +91 80963 13427 | Hyderabad, India
LinkedIn | GitHub | LeetCode | HackerRank

Professional Summary

Aspiring SDET with hands-on experience in Cypress and JavaScript automation and a portfolio project combining Playwright, TypeScript, API testing, GitHub Actions, and Gemini-powered AI test generation. Experienced in developing reusable automation components, validating web application behavior, and integrating automated tests into CI/CD. Interested in building reliable, maintainable, and AI-assisted test automation solutions.

Technical Skills

- **Automation Tools & Frameworks:** Playwright, Cypress, Page Object Model (POM)
- **Programming Languages:** Java, JavaScript, TypeScript, SQL
- **Testing & QA Concepts:** UI Automation Testing, REST API Testing, Functional Testing, Regression Testing, Postman
- **DevOps & Tools:** Git, GitHub, GitHub Actions
- **Methodologies & Concepts:** Agile, SDLC, STLC, CI/CD, API–UI Integration Testing, AI-Assisted Test Generation

Projects

AI-Enhanced Web & API Test Automation Framework GitHub Repository
Playwright, TypeScript, REST APIs, Google Gemini API, GitHub Actions

- Developed a reusable Playwright and TypeScript automation framework using Page Object Model, custom fixtures, and browser authentication setup.
- Implemented API testing and API-to-UI integration to validate product information and web application workflows.
- Integrated Google Gemini to generate structured login test scenarios and corresponding Playwright tests from documented page observations.
- Implemented static validation checks for generated TypeScript code before saving and executing AI-generated tests.
- Integrated regular and AI-generated test suites into GitHub Actions; verified 10 regular Chromium tests and 3 AI-generated tests passing in a CI run.

Playwright-Based REST API Automation Framework *TypeScript, Playwright, RESTful Booker API*

- Developed a reusable API automation framework using Playwright and TypeScript, with a generic API client supporting GET, POST, PUT, and DELETE requests.
- Implemented reusable test fixtures, typed API response models, and positive and negative API test scenarios.
- Automated booking-related API workflows using dynamically generated booking IDs and validated API responses.
- Integrated API and UI checks to verify booking creation through the API and validate the demo application's page load and title.
- Configured GitHub Actions for automated test execution and continuous integration.

Experience

Cognizant Technology Solutions Chennai, India
QA Automation Engineer Intern / Trainee Jan 2026 – Apr 2026

- Completed QA automation training focused on Cypress and JavaScript for web application testing.
- Developed and executed automation scripts to validate application functionality and expected UI behavior.
- Practiced test scenario design, assertions, and debugging to identify functional issues during test execution.
- Collaborated on web application testing exercises and contributed to automation tasks within the training projects.

Education

Anurag University Hyderabad, India
B.Tech in Computer Science and Engineering 2023 – 2026
CGPA: 9.01

SRRS Government Polytechnic 2020 – 2023
Diploma in Electrical and Electronics Engineering
CGPA: 8.54

ZPHS Namapoor
Secondary School Certificate CGPA: 10.00

Certifications

- Microsoft Azure AI Fundamentals
- Java – Codeforces Platform
- Cryptography Security – Online Certification
- HTML and CSS – Infosys Springboard
